Introduction to Philosophy
Spring 2010, Phil 001-302

Required Text:

* Readings which are not in the book will be posted on Blackboard

Course Description: This course is an introduction not only to the subject matter of philosophy, but also to the method of philosophy. To learn about the former we will read and discuss a range of philosophical essays (from ancient to contemporary sources), which address some of the most fundamental and important questions: What is the nature of underlying reality? What are the scopes and limits of human knowledge? Does God exist? What is the ultimate nature of persons? Do we have free will? What moral obligations do we have? What is the meaning of life? Through study, reflection, and responding to a range of answers to these questions, you will gain an appreciation for the method of philosophy; learning how to formulate, analyze, and criticize philosophical arguments, as well as to develop your own answers to these questions.

Assignments
10% Participation
40% Debates (20% for each debate)
50% Papers (25% for each paper)

Topics and Readings
